

ALW 12
Passive multifunctional speaker

Main features:

- 2-way system
- 1 x 12"
- 1" HF driver on rotatable CD horn
- High SPL
- Wooden enclosure
- Slim Design
- Exact dispersion

ALW 12

Passive multifunctional speaker

System-overview:

The ALW 12 is a compact loudspeaker in proven 2-way technology. Excellent sound and high power make the ALW 12 a perfect sound tool. The low tuned bass-reflex design enables a clear and balanced sound spectrum. Clear low bass frequencies are reproduced without noise through the flow-optimised large reflex opening. High grade components like the powerful 1" neodymium driver take care of precise high-frequency projection, delivering optimal sound quality.

Available as IP68-version on request.

Passive multifunctional speaker

Technical Data:

Configuration:	2-Way-fullrange-System, Bass reflex
Assembly:	1 x 12" neodymium-chassis 1 x 1" HF-driver on rotatable CD horn
Impedance:	80hm
Power handling	600/1000Watts
Dispersion horizontal:	80°
Dispersion vertical:	60°
SPL (1W/1M):	98dB
SPL max:	132dB
Frequency response:	40Hz – 20kHz
Enclosure:	Plywood, coated
Connector:	Speakon®
Colour:	Standard RAL9005 black, any RAL colour available
Weight:	17kg
Dimensions:	H-600 x W-380 x D-365 (mm)
Accessories:	Horizontal and vertical wall mount brackets
Options:	RAL-colour, 100-Volt transformer Available as IP68-version on request
